Error Log Entry

What error message did you encounter (if any)?

Exception in thread "main" java.util.MissingFormatArgumentException: Format specifier '%8s'

What unexpected behavior did your program exhibit?

It stopped executing the code and gave me that message.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

A syntax error, I forgot to include an argument.

Include a screenshot of specific lines of code.

```
System.out.format("%-10s %8s", "TOTAL VOTES:" + totalVotes);
```

How did you fix the issue?

I worked with AI in order to determine the solution and implemented it into my code.

Provide the corrected code or solution using a screenshot.

```
System.out.format("%-15s %8s %10s %n", "TOTAL VOTES: ", totalVotes, "");
```
